Industrial Inkjet Printer =>> Model: HR2800

This Inkjet Coding Machine is a mechatronic high-tech machine that can print by spraying patterns, letters and numbers on various surfaces, using electrophorus ink particles and based on the theory of high-voltage electronic defluxion. The machine can be widely used in the industry of food, medicine, cosmetic, and also in the processing industry of automobile, electrical wire and cable, aluminum and plastic tube, tobacco and alcohol and other fields. Ink jet machine can print MFG date, batch No. bar Code, trade mark, anti-fake logo etc. It is the cogent equipment promoting packaging modernization...

Features:

1. Can printing Chinese, English, Arabic numeral, pictures, special characters and etc...
 2. High definition in focus printing for character (printing style) or lattice letterform.
 3. Immovably distance, continuum/overtime printing, clock printing, inverted printing.
 4. Automatic printing the MFG date, time, bath No. bar code, trade mark, anti-fake logo etc.
 5. Easy control, Can connect and working with computer together.
 6. Low cost for expendable.
-

Technical Specification:

Model	HR2800
Power	50W
Voltage	220V±10% / 110V±10% V AC, 50-60Hz
Printing Rows	1-8 rows/adjustable
Word size(High)	1-18mm
Printing speed	Max 35m/minute
Connector	RS232、 USB
Working temperature	5-40℃
Humidity	90% No coagulation
Gross weight	21kgs
Outside Packing	By 600mm×480mm×530mm Carton
