Industrial Inkjet Printer =>> Model: LP-2600

This machine is a mechatronic high-tech machine that can print by spraying patterns, letters and numbers on various surfaces, using electrophorus ink particles and based on the theory of high-voltage electronic defluxion. The machine can be widely used in the industry of food, medicine, cosmetic, and also in the processing industry of automobile, electrical wire and cable, aluminum and plastic tube, tobacco and alcohol and other fields. Ink jet machine can print MFG date, batch No.bar Code, trade mark, anti-fake logo etc. It is the cogent equipment promoting packaging modernization.

Features:

1. Support Chinese & English menu switch.
2. Can save 20 messages, 400 characters for each length. Support BMP file download and update online.
3. Support the letters/messages overturn, inkjet delay, recorder function.
4. Can working in difference environments, as dust, dewiness, and wobbly production lines.
5. High capability, but less trouble for service.

Technical Specification:

Model	LP-2600
Voltage	220V±10% / 110V±10% V AC, 50-60Hz
Printing area	7 dot-matrix Nozzles : 5-20mm / 16 dot-matrix Nozzles : 20-50mm
Printing Speed	0.2m-91m/minute
Printing dot-matrix	5×7、10×16、16×16, (5×5, 10×10 can choose)
Printing distance	5-30mm
Memory	400 characters for each information, total support 20 information.
Communication interface	RS232 (Can choose)
Working temperature	0℃~45℃
Connector	RS232、USB
Working temperature	5-40℃
Humidity	90% (No coagulation)
Machine size	7 dot-matrix Nozzles (mm) 170×40×60 16 dot-matrix Nozzles (mm) 170×40×90 Main controller (mm) 25×170×40 Printing controller (mm) 170×150×60
Outside Packing information:	By 880×530×430mm Carton
Gross Weight	30kgs
