## Hand Control Industrial Inkjet Printer =>> Model: KPO-170B

This machine working from electrostatics to electrodynamics. An electrostatic system directs the flow of ink droplets to the right spots on an object. It can print by spraying patterns, letters and numbers on various surfaces, it's using electrophorus ink particles and based on the theory of high-voltage electronic defluxion. This machine can be widely used in the industry of food, medicine, cosmetic, and also in processing industry of automobile, electrical wire, cable, aluminum tube, plastic tube, tobacco, alcohol and other fields. Ink jet Machine can print MFG date, bath No. bar code, trade mark, anti-fake logo etc. It's the cogent equipment helping carry out the hygiene law and promoting packing modernization.

### Features:

1. Can printing Chinese, English, Arabic numeral, pictures, special characters and etc...
2. Continuum/overtime printing, clock printing, inverted printing...
3. Sprinkle the words, lot number, pictures and LOGO on bottle, pot, plastic, pipe, paper box, etc...
4. 3 times over striking. Easy control, Super information memory Functions.

### Technical Specification:

Model	KPO-170B
Voltage	175V-250V / 50-60Hz
Word size	1.5mm-17mm
Printing speed	1 m/second
Ink Color	Red / Blue / Green / Black /
Humidity	10%-90%RH
Gross Weight	2.5kgs
