## Vacuum Packing Machine ==> Model: DZ -260T

Vacuum packing machine is mainly used to pack food, medicine, native produce, sea food and condiment etc. For the purpose of preventing moisture, mildew, pollution and oxidation. Also such packing can save cubage, freight, prolong the shelf life, keep fresh and original color. Meanwhile, this machine can be applied for chemical materials, hardware, electronic parts etc. For long-term deposit and convenient transportation. This series of vacuum packing machine have the function of vacuuming, sealing, printing by one time.

### Features:

- 1 The machine designed for small packing (Such as tea packing).
- 2 Portability, can working at any time and any place.

### Technical Specification:

Model	DZ-260T
Power	110, 220V-240V/50-60Hz
Voltage	0.75KW
Pressure	< 1 KPa
Size of the vacuum chamber	330mm×260mm×80mm
Size of the hot seal	260mm×13mm
Exhaustment of pump	20m <sup>3</sup> /hour
Machine Size	470mm×330mm×300mm
Material	stainless steel
Gross Weight	56kg
Outside Packing	By Carton
