Vacuum Packing Machine ==> External Vacuum Model: DZ -600W

Vacuum packing machine is mainly used to pack food, medicine, native produce, sea food and condiment etc. For the purpose of preventing moisture, mildew, pollution and oxidation. Also such packing can save cubage, freight, prolong the shelf life, keep fresh and original color. Meanwhile, this machine can be applied for chemical materials, hardware, electronic parts etc. For long-term deposit and convenient transportation. This series of vacuum packing machine have the function of vacuuming, sealing, printing by one time.

Features:

1. The well-found function could meet different packing requirements, just for sealing, charging, vacuum packing, for charging inter gas after vacuum pumping.
2. Adopt the automatic procedure control, gasping, charging, sealing, mark letter, cooling etc, procedure automatically.
3. Adopt the double charging mouth with no vacuum chamber system, the package will be drop out from the charging month automatically after gasping (charging), perfect sealing performance, adjustable speed and high working efficiency.
4. Run by single chip automata, easy to use. Adjustable times on the gasping, charging and hot sealing, thus it is used for sealing all kinds of film and complex films.

Technical Specification:

Model	DZ-600W
Voltage	220V-240V/50-60Hz
Power	0.75KW
Pressure	< 0.66 KPa
Size of the hot seal	600mm × 10mm
Working table size	600mm × 400mm
Packing Speed	1-3 times / Minutes
Exhaustement of pump	20m ³ /hour
Machine Size	670mm × 500mm × 1000mm
Gross Weight	80kg
Material	stainless steel
Outside Packing	By 760mm × 660mm × 1155mm Carton
