Shrink Packing Machine =>> Model: BS-5530M-PE

This machine can wrap the shrink film around the packed products, then heating to shrink and enswathe the packed parts. It can display the products' appearance completely to enhance the aesthetic effect and value of the commodities. Meanwhile it can get better sealing, prevent moisture and pollution, also can reduce the exterior impact on the products. This machine adopts Quartz far-infrared tube as heating source to save more than 15% electricity.

Features:

- 1 This machine adopts e-timing motor, the temperature and electromotor transmit speed can be adjusted within a wide range. The carrying capacity of this machine is 40kg.
- 2 The vessel adopts totally enclosed hot wind of internal recycle system.
- 3 This series of packing machine has characteristics of advanced designed, steady performance and easy for maintenance etc. It can shrink film of PE or PP with excellent effect.

Technical Specification:

Modle	BS5530M-PE
Voltage	380V/50Hz
Max power	17.6 KW
Convey speed	0-10m/s
Temperature	0-250°C
Convey capicity	40KG
Max packing size	550mm×300mm
Machine size	2560mm×856mm×1480mm
Weight	220kg
Outside Packing	By Carton
